CHAPTER – 1A
TRAFFIC ACCIDENTS

Introduction

India has a well-knit and coordinated system of transport which plays an important role in development of economic activities by promoting fair distribution of produced goods and services and movement of people. The share of transport sector in Gross Domestic Product (GDP) of India is steadily growing. It is one of the key indicators in assessment of socio-economic development of the country. Since traffic accidents are indicator of bottlenecks and other hindrances in smooth flow of traffic, hence NCRB collects detailed data on traffic accidents including road accidents for inferring the trend and patterns of traffic accidents for the planners to devise appropriate preventive strategies.

The Bureau collects data on ‘Traffic Accidents’ comprising of (i) Road Accidents (ii) Railway Accidents and (iii) Railway Crossing Accidents, as these are the major contributors of accidental deaths.

Number of ‘Traffic Accidents’ in the country have increased from 3,68,828 in 2020 to 4,22,659 in 2021. (The rate of deaths in road accidents per thousand vehicles has also increased from 0.45 in 2020 to 0.53 in 2021). Maximum increase in number of traffic accidents cases in States from 2020 to 2021 was reported in Tamil Nadu (from 46,443 to 57,090) followed by Madhya Pradesh (from 43,360 to 49,493), Uttar Pradesh (from 30,593 to 36,509), Maharashtra (from 24,908 to 30,086) and Kerala (from 27,998 to 33,051). [Table–1A.1]

These traffic accidents resulted in injuries to 3,73,884 persons and 1,73,860 deaths during 2021. State of Uttar Pradesh (24,711 deaths) followed by Tamil Nadu (16,685 deaths) and Maharashtra (16,446 deaths) have reported maximum fatalities in traffic accidents in the country; these 3 States accounted for 14.2%, 9.6% and 9.5% of total deaths in traffic accidents respectively and collectively accounted for 33.3% (57,842 out of 1,73,860) of total fatalities reported at all India level during 2021.

The percentage share of traffic accidental deaths in total deaths due to ‘Other Causes' has decreased from 45.1% in 2017 to 44.5% in 2021. A rising trend was seen in total number of deaths in ‘Traffic Accidents' from 2017 to 2019 with sharp decline in 2020, which has again increased in 2021 but this number in 2021 is less than that in 2017, 2018 & 2019. Total number of Accidental deaths have increased by 18.8% (from 1,46,354 to 1,73,860) in 2021 over 2020. [LIST-1A.1]

These traffic accidents comprise of 4,03,116 road accidents, 17,993 railway accidents and 1,550 railway crossing accidents and caused 1,55,622, 16,431 and 1,807 deaths respectively during 2021.

Road Accidents

The Bureau has made an effort to capture comprehensive information on road accidents using the revised proformae and published the first report for the year 2014 and this edition is eighth in the series.

A total of 4,03,116 road accident cases were reported during 2021. Road accident cases in the country have increased from 3,54,796 in 2020 to 4,03,116 in 2021 [Table-1A.1]. The fatalities in road accidents have increased by 16.8% (from 1,33,201 in 2020 to 1,55,622 in 2021). The LIST–1A.1 can be referred to see the patterns of ‘Road Accidental Deaths’.

The number of vehicles, number of road accidents along with resultant fatalities and injuries therefrom, their percentage variations over previous year and the rate of accidental deaths per thousand vehicles during the last five years are presented in LIST–1A.2. It is observed that the rate of deaths per thousand vehicles in 2021 has increased from 0.45 in 2020 to 0.53 in 2021.
